BAUMER HUBNER HEAVY-DUTY TACHO'S & ENCODERS

The tacho generators and encoders of Baumer Hübner GmbH are "Heavy-Duty" sensors that have proven their services for many years now in all sorts of industrial environments. Their function is to give feedback of rotating movements, such as speed and position.

Encoders are frequently used on electro motors in paper and steel industry; placed on cranes and handling systems (such as palletizers and pick & placers). They are also used in combination with testing equipment and inspection systems.

The features of BAUMER HUBNER technology.:

- Robust design: high vibration and shock resistance with special surface protection for hostile environments.
- Several mounting options (EURO flange B10, hollow shafts and others).
- Optoelectronic and magnetic sensing. No battery required for absolute encoders by patented system.
- Protection from shaft currents.
- Protection class up to IP 69K.
- SIL 2 safety level available.
- Large choice in accessories for safe installation and reliable signal transmission.
