FMS FORCE MEASURING TECHNOLOGIES

FMS was founded in 1993, following a buyout from the FAG Kugelfischer company. Since that time, a dedicated team has been establishing its own company history in the web tension and web guiding industry through market-leading developments and successful international expansion. Today, FMS is the company of choice for manufacturers and users of web processing equipment around the globe.

FMS closed loop control systems for web tension and web guiding continually maintain all the relevant parameters to ensure precise compliance with the reference values needed for optimum performance of your production line.

FMS Force Measuring Technologieselectromagnetic provides you:

- Full tension control through sensors, amplifiers & controllers
- High quality and ultra-durable force measuring sensors for continuous monitoring and process control
- Radio Transmitted Tension Monitoring; no signal cables required
- Precise web guiding for maintaining the correct position of the web
- Contact-less belt scales for precise weight measurement of bulk goods
